

DB702U

700 Series 6 Terminal Conventional 2-wire Base - 150 mm

General

The DB702U is a large rim conventional fire detector base used for all 700 series conventional fire detectors. It includes a normally closed continuity switch to allow for easy cable testing during installation. Inserting a detector into the base “opens” the continuity switch in the base to allow for standard open circuit monitoring. A locking mechanism implementation in conjunction with the detector allows for the detector to be safeguarded against unauthorized removal.

Details

- Insert detectors without using force
- One way only fit
- Locking mechanism provided

DB702U

700 Series 6 Terminal Conventional 2-wire Base - 150 mm

Especificaciones técnicas

General

Compatibilidad	Aritech 700 series detectors
Conectividad	2-wire zone with COM/NO/NC or remote indicator

Eléctrico

Terminales	6
------------	---

Físico

Dimensiones físicas	150 x 15 mm (Ø x H)
Peso neto	106 g
Color	Blanco nuboso (RAL 9001)
Tipo de Montaje	Montaje en el techo
Entradas de cable	1
Material (caja)	Plástico

Medioambiental

Antivandálico	No
Temperatura de funcionamiento	-10 to +50°C
Temperatura de almacenamiento	-10 to +70°C
Humedad relativa	10 to 95% noncondensing
Entorno	Interior

Regulador

Cumplimiento	CE, REACH, RoHS 3, WEEE
--------------	-------------------------
